### DETAILED ACTION

1. Although specific claims may be discussed in the rejections below, these rejections are also applicable to all other claims in which the noted problems/language occur.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims <sup>15-</sup>~~1~~-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. Claim 15 recites a method for detecting an analyte of a sample by contacting with the compound as disclosed, but the method does not provide any specific binding partner for the analyte. It is unclear how an analyte would be detected without the analyte first being bound to a specific binding partner and thus is it unclear how does this assay work? Dependent claims 16-25 are also indefinite for the same reason as stated above.

Claims 16-20 lacks antecedent basis for the terms "enzyme", "antibody" and pH, as the steps in the method of base claim 15 don not mention those terms.

- b. Claim 15 is indefinite for failure to define X'.
- c. Claim 21 is indefinite because it is not clear how the "measuring" of compound is performed i.e. it is not clear what step(s) are involved in the measuring process.

***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 26-29 are rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent No. 6,723,851 B2 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: There was no restriction in the parent application between a compound and a composition. The compound in the current composition claim (claim 26) reads on the compound of the patent (6723851B1). As for claims 27-29, the patent also discloses about the pH and shelf life of the compound (column 2, lines 60-67).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during

Art Unit: 1641

prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Allowable Subject Matter***

6. Claims 15-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
